Experience	CleverHans lab @ University of Toronto / Vector Institute PhD intern	March - Aug. 2025 Toronto, Canada
	Δ-audits: certifying audit external validity over time. I develop, with Mohammad Yaghini and Nicolas Papernot a method to detect when a ML audit has to be re-done.	
	Université de Rennes, INRIA, CNRS, PEReN PhD Student. Auditing the mutations of online AI models.	November 2022 - Present Rennes Paris, France
	Naverlabs Europe Research Intern: Search and Recommendation	April - October 2022 Grenoble, France
	Content Diversity in Search and Recommendation Systems. Trained and evaluated neural retrievers (BERT, SPLADE and variants) on large scale GPU platforms. Created theoretical tools derived from Information Theory and Optimization to understand the emergence and optimization of diversity in Search and Recommendation systems.	
	Nokia Bell Labs Research Intern: Multi-Agent Pathfinding	February - August 2021 Nozay, France
	ISP, ENS Paris-Saclay Research Intern: Content diversity in music recommender systems	September 2020 - February 2021 Gif-sur-Yvette
Teaching	eLichens Engineering Intern: Signal processing	May - August 2020 Grenoble, France
	Lycée Louis Pasteur Mathematics Oral Examiner (Khôlleur)	September 2017 - July 2021 Neuilly-sur-Seine, France
	Optimization, MSc Convex optimization, proximal optimization. I created and taught the practical labs.	2023-now Université de Rennes
	Tools for statisticians, BSc Introduction to Git, Jupyter Notebooks and Latex	2023-now ENSAI
	Trusworthy Machine Learning, Msc Practical labs on Differential Privacy, DP-SGD and Explanations	2024-2025 Univesité de Rennes

Education	Université de Rennes, INRIA, CNRS, PEReN		2022 - est. Feb. 2026
	Measuring the mutations of online AI models		PhD
	I develop a theoretical model of audit manipulations. My aim is to bridge the current AI auditing practices with robust estimation theoretical tools. To that end, I work closely with <u>PEReN</u> : the French center of expertise for digital platform regulation.
